Launch Your Patient Care Experience with **Health Cloud**

Virsys12's Health Cloud Quick Start package for growing companies accelerates the Salesforce Health Cloud implementation for patient acquisition, appointment tracking/activities, care coordination and follow-up. This quick-start solution allows you to get started with Health Cloud while creating a foundation for future growth for scalable patient care/engagement needs.

Health Cloud Quick Start Packages by

Patient Demographics | Appointment Tracking | Care Coordination | Follow-up/Retention with activities, task, notes, events

Discovery
Initial half-day scoping and prioritizations session

Account and Contact Demographics Tracking and Management
Capture demographic information on your customer accounts and contacts

Appointment Tracking
Monitor all associated appointments through activity tracking; keep the patient moving forward from initial lead to patient care and track steps along the way

Care Coordination
Manage care in Health Cloud with an initial Care Plan, Patient Card, Chatter, and Timeline

Follow up/Retention
Capture the process of the patient journey and associated follow-up

Training
Initial half-day training session to help you build your own automations

Fixed Price of $20,000 based on specified deliverables and defined scope delivered within 100 hours of prioritized work. Recommended for 10 or less EE or UE licenses to get started on your Health Cloud journey. Additional configuration, integrations, appropriate applications and strategy available on a time and materials basis. Contact a Virsys12 representative for more information.
