

Provider Data Engine

V12 PDE is a proactive, self-correcting, “provider data engine” that solves for costly compliance and provider data issues faced by payers, managed care organizations and others managing provider networks and compliance.

Key Benefits

- ✓ Accurate self-correcting provider profile data from multiple internal & external data sources including claims, provider scorecards, CMS data and more....
- ✓ Bi-directional access from any system including Health Cloud, Vlocity, Kyruus, V12 Network & more...
- ✓ Query, view & sync provider profiles
- ✓ Configurable ranking logic & % data accuracy logic
- ✓ Built-in OIG exclusion checks (with subscription)

The **risks are high** for inaccurate provider data and network adequacy:

Claims Payment Risk

- Improperly-paid claims
- Claims adjustments
- Lengthy, expensive recoupment
- OIG exclusions go unchecked

Regulatory Risk

- Non-compliance
- Costly fines up to \$25k/incident

Coverage Risk

- Perceived as deception
- Non-compliance
- Costly Fines

Quality Risk

- Disconnected provider data
- Inability to manage costs narrow
